

1.3.2 Details of value-added courses for imparting transferable and life skills offered during the year

1.3.3 Number of students enrolled in the courses under 1.3.2

Name of the value-added courses (with 30 or more contact hours) offered	Course Code, if any	No. of times offered during the year	Duration of course (in hours)	Number of students enrolled during the year
Building a road using civil 3D	NA	1	42 Hrs	32
Data Analytics	NA	1	30 Hrs	9
Python Fundamentals For Beginners	NA	1	30 Hrs	6
FULL STACK DEVELOPMENT, CYBER SECURITY	NA	1	30 Hrs	3
Python fundamentals	NA	1	30 Hrs	23
Programming using python	NA	1	30 Hrs	1
Artificial intelligence expert course	NA	1	30 Hrs	2
Java	NA	1	30 Hrs	12
SQL	NA	1	30 Hrs	3
Data Science	NA	1	30 Hrs	4
DevOps	NA	1	30 Hrs	1
Machine learning	NA	1	30 Hrs	11
Web development full stack	NA	1	30 Hrs	1
HTML, CSS and JavaScript	NA	1	30 Hrs	3
Learning python for data analysis and visualisation	NA	1	30 Hrs	1
Fundraiser intern	NA	1	30 Hrs	1
DATA MINING	NA	1	30 Hrs	2
CLOUD COMPUTING	NA	1	30 Hrs	3
Internship program	NA	1	30 Hrs	1
Programming for Everybody(with Python)	NA	1	30 Hrs	2
TCS (GBU)	NA	1	30 Hrs	1
Web development	NA	1	30 Hrs	6
Google Analytics Advanced course	NA	1	30 Hrs	1
Azure cloud computing	NA	1	30 Hrs	1
Stack developer	NA	1	30 Hrs	1
AWS Technical Training	NA	1	30 Hrs	1
Google IT support	NA	1	30 Hrs	1
Cyber Security	NA	1	30 Hrs	2
Solidity	NA	1	30 Hrs	1
Power Bi	NA	1	30 Hrs	1
Web Scrapping through python	NA	1	30 Hrs	1
C, C++	NA	1	30 Hrs	1
Microsoft Azure Application	NA	1	30 Hrs	1
Master Class on Artificial Intelligence	NA	1	30 Hrs	9
Master Class on Embedded C Programming	NA	1	30 Hrs	25
Virtual Reality Master Class	NA	1	30 Hrs	2
Internship on embedded system design and IOT	NA	1	30 Hrs	1
Introduction to Python	NA	1	32 Hrs	48
Java programming fundamentals	NA	1	36 Hrs	1
Wireless 5g overview	NA	1	55 Hrs	6
Java programming fundamentals	NA	1	36 Hrs	1
Creating 3D environment in Blender	NA	1	66.5 Hrs	1
VLSI - Physical Design	NA	1	33 Hrs	4
The web developer Bootcamp	NA	1	64 Hrs	1
The complete 2022 Web development Bootcamp	NA	1	66 Hrs	1
Logistic Regression	NA	1	30 Hrs	1
CSS and java script – creating single page Flexbox website	NA	1	32 Hrs	1
C Programming	NA	1	30 Hrs	2
Microwave and Beyond: Present and Futuristic Wireless Communication Systems	NA	1	30 Hrs	1
Python programming	NA	1	38 Hrs	1
Embedded system	NA	1	30 Hrs	1
Python for beginners	NA	1	32 Hrs	1
Basics of Induction motors	NA	1	100Hrs	26
Basics of Power Systems	NA	1	100Hrs	34
Applied Robotic Control Lab	NA	1	12 Weeks	33
NX CAD Essentials	NA	1	100 Hrs	58
Mechatronics	NA	1	100 Hrs	54

COURSES OFFERED BY CEMS

SOFTWARE DESIGN CAD/CAM/CAE DOMAIN

CAD NX-11	CAM Tecnomatix	CAE	PLM TeamCentre	LMS	VR
Essentials for Designers	Manufacturing Fundamentals	Advanced Simulation	TCUA Using TC	Vibration Measurement & Analysis	Virtual Reality
Sketching Fundamentals	Turning Manufacturing Process	Composite Structure & Assembly	TCUA Installation	Modal Testing & Analysis	
Synchronous Modelling Fundamentals	Tecnomatix Process	Advanced Finite Element Analysis	TCUA Integration for NX users	Acoustics Measurement & Analysis	
Sheet Metal	Tecnomatix RobCAD		TCUA Application & Data Model Administration	Acoustics NVH Simulation	
Drafting Essentials	Technomatix Flow			Multi Body Dynamics	
Intermediate Design & Assembly	Nesting Productivity Improvement				
Advanced Assembly Design	Dimensional Accuracy Control				
Class A Free Form Modeling					
Hull Design					
Engine Design					

SOFTWARE

NX-11

CENTRE OF EXCELLENCE IN MARITIME & SHIPBUILDING

COMPETENCIES, METHODOLOGY, EMPLOYABILITY & SKILLS
CREATING COMPETENCIES FOR INDUSTRY 4.0

SKILL DEVELOPMENT INITIATIVE OF GOVT OF INDIA

CEMS VIZAG

High end Engg, Software & Hardware Courses in **Design & Manufacturing** for Students & Industries, with the vision to facilitate transition to Industry 4.0

Centre of Excellence in Maritime & Shipbuilding (CEMS) is a dedicated Skill Development Centre in Maritime, Manufacturing, Automobile, Aerospace, Defence Production, Oil & Gas & Heavy Engineering Sectors.

Our Mission is

- To bridge the skill gap between Students & Industry by providing advanced Skill training, facilitating better job opportunities & placements.
- To re-skill the employees to facilitate ready transition to Industry 4.0 & to make Industry more automatised & competitive.

- Strategically located in Vizag & Mumbai
- Section 8 'Not for Profit Organisation'
- Courses in advanced CAD/CAM/CAE, Simulation, Test & Optimisation Software, Digital Manufacturing & Hardware Technology
- Courses Certified by Siemens & IRCLASS

COURSES ARE RELEVANT FOR THE FOLLOWING INDUSTRIES

DEFENCE

SHIPPING

AEROSPACE

OIL & GAS

HEAVY ENGG

AUTOMOBILE

PRODUCT DESIGN & VALIDATION LAB

Siemens NX-11

Product Design and Validation Lab would cover courses in Product Design & Validation for Manufacturing. The course will be modular, open, scalable with design and engineering solutions. It includes multi-physics simulations, static and dynamic stress analysis, Computational Fluid Dynamics (CFD), Finite Element Analysis (FEA), thermal analysis, system-level dynamic analysis and composites.

TEST & OPTIMIZATION LAB

Siemens LMS Test Lab

This lab offers a unique combination of simulation software, mobile and lab testing systems & analysis in follow areas:
i. Vibrational Measurement & Model Testing
ii. Acoustics & NVH Simulator
iii. MultiBody & Structural Dynamics
LMS Test Lab offers you a complete, integrated solution for test-based engineering that combines high speed multi-channel data acquisition with full suite of integrated testing, analysis, and report generation tools.

NESTING PRODUCTIVITY IMPROVEMENT

CADWIN

Nesting software reduces wastage in steel plates by optimising use of steel sheets using Nesting s/w in CNC Machines, used to cut steel. It helps management of resources and work processes efficiently and by using integrated process for part and steel plate from design to production for manufacture industries including shipbuilding and plant, bridges and heavy machines, etc.

AUTOMATION

S7 1200, S7 1500PLC

Automation Lab allows the students to understand the requirement and functioning of Programmable Logic Controllers (PLCs). This is the first step toward Internet of Things (IoT). Here the students learn how to Program Industrial PLCs, work with Industrial Human Machine Interface (HMI), Industrial SCADA (Supervisory Control & Distributed Acquisition) and PLC networking using Profibus and Profinet.

ELECTRICAL & ENERGY LABS

SIMOCODE

Electrical lab makes students explore fundamentals of Motors, Power Electronics, Electrical Drives & Low Voltage Switchgear. Participants are trained on basics of AC & DC Motors, Power Electronics Components, Speed control of AC/DC motors with Drives, Motor maintenance/servicing, Product selection based on application requirement, Diagnostic & troubleshooting strategies.

ADVANCED MANUFACTURING LAB

Siemens TeamCentre, Technomatix & RobCAD

Advanced Manufacturing Lab offers courses for process design, simulation & Optimization of plant layout. DM allows engineers to create manufacturing process, in a virtual environment, including tooling, assembly lines, work centres, facility layout and ergonomics. It helps to create 'Process Twin'.

DIMENSIONAL ACCURACY CONTROL SYSTEM

SAMIN

Students/ industry personnel would learn to analyze dimensional accuracy of steel structures, such as plant modules and shipbuilding blocks which are fabricated by modular construction technique and comparing it with 3D design. Dimensional accuracy controls enables to correct errors, if any in initial construction phase itself.

HULL DESIGN

Siemens NX-11, PARAMARINE

Hull Design Software allows students to quickly create hull forms or any geometric shape within the software suite. Hull Generator provides the capability to rapidly define complex surfaces using a minimal number of curves. From these surfaces solid bodies can be formed.

PROCESS INSTRUMENTATION

PCS 7

Process Instrumentation Lab imparts skills & knowledge on complete Process Automation & Process Instrumentation in all types of Process Industries. Students are trained on Distributed Control Systems & Configuration, Measuring Technologies for Pressure, Temperature, Level & Flow, Valve Positioning, selection of smart instrumentation & their integration with automation of system.

RESEARCH MACHINE SHOP

SINUTRAIN, 840D sl

CNC Controller Lab enables students to understand the concept of CNC Programming and work real Sinumerik 808D controller for Turning and Milling applications. The students will also get to work on the Sinumerik 840D sl rack which supports programming up to 31 Axis. This would enable students to program complex jobs. The students can learn how to program and test the CNC Program using the Sinutrain software.

MECHATRONICS

Modular Mechatronics System

Mechatronics lab allows students to work on a mini factory like setup and on areas such as Pneumatics & Hydraulics, Sensors, Communication Protocol, PLC programming, PLC Networking using Profibus and Profinet. The Mechatronics Lab imparts expertise in the field of Mechatronics systems/processes. Students are trained on various Electrical, Mechanical, Pneumatics & E- Pneumatics, and component troubleshooting Techniques with System Approach. It benefit students from all streams to build knowledge in multiple domains.

VIRTUAL REALITY

OCULUS- RIFT, BARCO-3D

The capabilities of the Virtual Reality Lab would be Walkthroughs, Ergonomic reachability studies, High end data visualization, Interactive videos, Virtual Training. The areas where the virtual reality lab would be helpful for visualization are:
i. Design Walkthroughs
ii. Manufacturing planning
iii. Outfitting validation
iv. DFA & DFM
v. MRO Analysis (Maintenance, Repair & Overhaul)

PNEUMATICS & HYDRAULICS

PNEUMATICS & HYDRAULICS SYSTEM

Pneumatic Lab is capable of being used to demonstrate the design, construction and application of pneumatic components and circuits
i. Design & function of a pneumatic system
ii. Function & identification of pneumatic components and their symbols

Hydraulic Lab is capable of being used to demonstrate the design, construction and application of Hydraulic components and circuits..

ROBOTICS

KUKA ROBOTIC UNITS

Robotics Lab enables knowledge on:
i. Advanced manufacturing techniques
ii. Automation combined with advanced manufacturing technology
iii. Sequence Planning, Process Planning, Shop Floor Layout generation for robotic applications
iv. Offline / On-line sequence execution techniques for robotics
v. Monitoring & Virtual simulation generation for sequences
vi. Offline programming of robotics controller.

RADAR LAB

RADAR SYSTEM

Radar Training Lab combines real-world radar with the power of modern surveillance technology. It uses patented technology to detect and track passive targets at very short range in the presence of noise and clutter. The radar system is fully operational and covers principle of Pulse, CW Doppler, FMCW, Doppler & MTI radar etc.

WELDING PUMPING & PIPING

KEMPPI WELDING

Welding Lab will enable participants to develop a thorough understanding of key welding concepts to design and produce quality welds, reliably and economically.
Pumps/Piping Training Systems Lab familiarizes students with pump/pipeline operational principles and associated maintenance tasks such as pump/pipeline installation, lubrication, shaft alignment, inspection, & component replacement.
