Introduction:

Department of Mechanical engineering from NSRIT Engineering College arranged Two day Workshop for Vth & IIIrd Semester students on **“Drone Technology”** dated 03rd & 4th November, 2022 for better technical knowledge enhancement of students.

Workshop is important especially important in the field of Engineering as the practice of engineering has an inherent (and unavoidable) impact on society. These programs can be a powerful tool to constitute a positive industrial climate and can range from basic manufacturing system programs for students. Overall, the aim of all these visit to trains the students to adapting to changing scenario of technology. After Workshop students can identify their own efficiency and performance which important for their career, improving work efficiency and confidence.

Purpose:

Workshops are an integral part of Engineering and acknowledgment of technological up gradation. The purpose of Workshop for students is to provide technical knowledge with the technically manning sensitive military areas to luring hobbyists throughout the world, drone technology has developed and prospered in the last few years. Individuals, commercial entities, and governments have come to realize that drones have multiple uses Drones are small remotely controlled aerial vehicles, i.e., they are unmanned aerial vehicles. They look like helicopters or reconnaissance aircraft and, without a doubt, one of their strengths is the many different applications for which they can be used.

What We Learn? :

03rd & 4th November, 2022 learnt Drones are unmanned aerial vehicle. Drones are kind of air vehicle which fly without any actual pilot or crew on board. So, it is often referred as unpiloted aircraft. UAV (Unmanned Aerial Vehicle) is made up of light composite materials which reduce their weight and increase their strength and manoeuvrability. Initially drones were only used by military. Now it is used by many professional and individuals. Drones are used in various fields. Areas in which drones can be used are construction, defence, photography, marketing, delivery, agriculture, rescue, entertainment etc.

Conclusion:

From this Workshop, we got the information and practical knowledge about Drone Assembly, Kinematic involved and Battery thermal Management System in Drone Technology. They got the idea how Kinematic system works are made in Technology and its GPS Process.

About 89 students of Vst & IVth Semester Mechanical Engineering Students of NSRIT Engineering College, & faculty members benefited from this Workshop as they got chance to discussion with Resource Person. Students were eagerly to say organizing this type of Workshop for practical exposure which is shows the success.
